

Instructions for authors on how to prepare accepted (or close to accepted) manuscripts for publication

Manuscript guidelines

1. When accepted for publication, authors are responsible for providing language checked manuscripts that require no, or almost no, copy editing.
2. The journal is agnostic as to what kind of English spelling principles to be used. Yet, authors are generally expected to choose a UK or US form of English and use it consistently within a contribution.
3. Contributions are submitted as a Word file. Please use a serif typeface, preferably in 12 points.
4. Please supply full names, affiliation, postal addresses, telephone numbers and email addresses for all authors on a cover page. If there is more than one author, please note who will be corresponding author. In addition, please supply a short biographical note on all authors.
5. Manuscripts should include an abstract with no more than 200 words on the title page.
6. In connection to the abstract up to six keywords should be supplied.

Style guidelines

1. Contributions should commit to the Chicago Manual of Style (16th edition) as regards referencing and copy-editing principles.
2. Authors are required to use author-date references, one of Chicago's two systems of documentation.

In text references, examples:

(Stark 2009)

(Eymard-Duvernay and Marchal 1997)

(Barrey et al. 2000; Cochoy 2002)

3. Please supply full references, including first names, in the reference list in the end of the article.

Lay-out and proofs

1. Authors will receive proofs after the text has been put into the lay-out of the journal (as pdf).
2. Authors are requested to make a thorough proofreading. This is for capturing typographical errors and the like and is not for more substantial alterations of the contribution.
